About This Document

The copy is written in Anara's voice — direct, warm, grounded in real India-market context — not generic wellness language.

Voice principles:

The Anara voice uses contrast frames: **a short honest statement of the problem, followed immediately by what Anara does about it.** It names the specific **gap** (participation, not access; follow-through, not awareness). It references the real mechanics of Indian corporate health: GMC, TPA, OPD reimbursement budgets, WhatsApp. **It speaks to the HR Director's career risk, not just the employee's health outcome.**

Primary audience:

India-based HR Directors and Heads of Total Rewards at MNC and GCC employers. These people care about two things: **making their India benefits credible to global HQ**, and **not creating more work for themselves.**

SECTION 2

Hero Section

The hero earns the scroll. Copy below is calibrated to the India MNC HR Director reading on a corporate device during a quick break between meetings.

EYEBROW TAG:

Corporate Healthcare for India's MNCs and GCCs

HEADLINE:

Your benefits package is strong.

Your employees still are not getting healthier.

SUBHEADLINE:

Anara comes to your office. We run the health checks, follow up with every employee, and give your India team the convenient, top quality benefits they need. No new budget line — Anara works outside your GMI coverage or through the OPD reimbursement budget you already have.

SECTION 3

About / Positioning Block

THE ANARA DIFFERENCE

Most health vendors deliver below 50% participation because they expect employees to go find the care themselves. Anara is different. Anara brings top Doctors and Nurses to your office to conduct blood tests, comprehensive health checks, follow up clinics, and more — and then we follow through with every employee individually, to ensure improved satisfaction and health.

ONE-LINER:

Anara Health is India’s premium corporate healthcare partner for top employers who need more than a checkbox.

SECTION 4

Why Anara — 4 Differentiator Cards

Four cards. Titles are specific, not categorical. Body copy is honest, not hyperbolic. Each addresses one concrete reason an India HR Director would choose Anara over the alternative.

Participation is the gap. We come On-Site and fix that.	Every employee gets a follow-up. On-site or On Demand.	Population Health Analytics and Digital Health Wallet	No new budget line. Works through your GMC.
Anara clinics typically see 85%+ participation, far beyond what other vendors deliver. The difference is operational: we come to your office and see employees during their working day. No commute. No leave. No excuses.	After the clinic, our doctors send a personalised summary and action plan to every employee on WhatsApp. No one is left to figure it out alone. Short of putting the pill in their mouth, this is the closest thing to closing the loop.	We give your India HR team a population health report after every engagement — anonymised, benchmarked, and formatted for the board deck. Employees also receive all their Reports in the Anara Digital Health Wallet.	We know how to work directly with your company, or your TPA and broker, to deploy Anara and maximise the value. We help you avoid any extra red tape and unnecessary additional approvals.

— Rahul Reddy, CEO, Anara Health

SECTION 6

Service Packages

Four core service lines. Each should feel like a specific product, not a category. Framed around the employer's pain point first, clinical outcome second.

PACKAGE 1

Employee Health Checks — On-Site Blood Tests + Doctor Visit

We run a full health check clinic at your office, on a date you pick. Our doctors screen for the conditions that are quietly costing you the most — hypertension, diabetes, weight loss, nutrition, skin issues, lung problems, thyroid, mental wellbeing, and more. After the clinic, you receive a population health report with anonymous reporting about your employee health and improvement over time.

What you get: Population health report. Individual employee summaries. Year-on-year trend data. A program your global HQ can point to.

PACKAGE 2

Comprehensive Preventive Care — On-Site Health Checks + Follow Up Clinics + On Demand Telehealth

The dedicated Anara team of Doctors and Nurses visit your office to conduct comprehensive health assessments for your employees. More thorough than a standard health check, with an emphasis on cardiovascular risk, executive stress markers, and preventive planning. No waiting room. Full confidentiality. The first cohort can be up and running in four weeks.

What you get: Individual health reports per executive. A 12-month preventive plan. Direct doctor access for follow-up questions.

PACKAGE 3

Elder Care — Parents and Dependents at Home

Ideal for: Employers whose GMC covers parents under a family plan.

India's family insurance covers parents. Most insurers stop there. Anara offers trained Care Manager for home visits or on-demand telehealth for the employee's parents. Anara helps manage medications, accompany to hospital appointments, coordinate labs, and more. The employee also gets updates in real time.

What you get: Measurably lower employee stress and absenteeism. A benefit your people will mention at every offer negotiation.

ADD-ON PACKAGES

Specialty Clinics, Women's Health, Vaccines, and Custom Seminars

Ideal for: Employers who want year-round access and measurable trend data.

Anara offers comprehensive services to meet all your organisation's and employees' needs.

What you get: Year-on-year population health trends. A story you can tell at global health and wellness reviews.

SECTION 7

How It Works — 4 Steps

Operational and honest. Removes the mystery around what partnering with Anara actually means week-to-week.

1 Pick a date You tell us when works for your site. We handle everything else: equipment, doctors, setup, and employee communications.	2 We run the clinic on-site Our doctors come to your office and run a full health check. 80–90% of your employees participate because they don't have to go anywhere.	3 Every employee gets a WhatsApp follow-up Within 48 hours, each employee receives their personal results and a specific action plan from their doctor. Clear, private, actionable.	4 You get a population health report Anara delivers an anonymised summary of your workforce's health trends — benchmarked, formatted, ready for global stakeholders.
---	--	--	---

SECTION 8

Inside Anara — Gallery Captions

4 image captions for the photo carousel. Documentary in tone, not promotional.

Caption 1: An Anara doctor reviewing results with an employee at an on-site clinic in Bengaluru. Most employees meet their Anara doctor for the first time at a scheduled corporate visit.	Caption 2: A Care Manager conducting a home visit for an employee's parent in Mumbai. Our elder care team visits weekly, manages medications, and sends real-time WhatsApp updates to the family.
Caption 3: The Anara Digital Health Wallet — live at secure.anara.health. Employees access health history, lab results, and doctor summaries in one place. Zero complaints since launch.	Caption 4: The Anara team at a quarterly clinic for a large corporate client. Same date, same team, every quarter — employees know when to expect us, and they show up.

SECTION 9

Our Care Team

6 role cards. Followed by a second founder quote. Make these feel like real people, not an org chart.

Doctors	Care Managers	Health Coaches
MBBS and MD physicians trained in preventive care. Available on-site for clinic days and on WhatsApp for follow-up. Not teleconsultation operators — generalist doctors who know your workforce.	For elder care. Many are retired army personnel, nurses, or trained caregivers. They do home visits, manage hospital accompaniment, and handle the logistics of elderly care so your employee doesn't have to.	For post-clinic follow-through. They check in on employees with high-risk findings — elevated BP, pre-diabetic readings, high stress scores — and help them build a plan they'll actually stick to.
Lab Coordinators	HR Relationship Leads	Wellness Program Leads
We coordinate between clinic, lab, and employee. Results come back to the employee's WhatsApp. No one is chasing a paper report two weeks later.	Your single point of contact at Anara. They manage scheduling, employee communications, post-clinic reports, and any escalations. Your HR team should not need to manage us.	For companies that want more than clinics: mental health programs, nutrition workshops, de-stress sessions. Led by qualified practitioners, not generic wellness vendors.

“We take the health piece completely off your plate. You shouldn't have to think about scheduling, employee communications, lab coordination, or reporting. That's what we're here for.”

— Rahul Kumar, Co-Founder, Anara Health

SECTION 10

What Our Clients Say

3 testimonial cards grounded in real client feedback. Attribution is specific enough to be credible.

<i>“We've tried three corporate health vendors in India. Anara is the first one where I don't have to chase anyone. The report shows up. The employees are happy. My global CHRO stopped asking</i>	<i>“The elder care program has been a game changer for retention. When employees know Anara is looking after their parents every week — not just in an emergency — that's not something a salary increment replaces.”</i>	<i>“Our participation rate went from 45% to 87% in the first quarter. The difference was purely operational — Anara came to us, during work hours, with a proper setup. Employees just showed up.”</i>
---	---	--

<i>me what we're doing on wellness."</i> Head of HR, India Operations Global Financial Services Firm, 800 employees in India	HR Director MNC Technology Company, Bengaluru	Total Rewards Manager Global Engineering & Consulting Firm, Pune

SECTION 11

Built for India's HR Teams

Specifically designed for multinationals and GCCs managing Indian workforces.

No new budget approval needed	Data your global HQ will respect	We run the program. You don't.	Pan-India coverage
Most clients run Anara through their existing OPD reimbursement budget — typically ₹5,000–15,000 per employee per year, already sitting in your GMC. We know how to structure our engagement so it qualifies. Finance doesn't need to see a new line item.	Anonymised population health reports, year-on-year trend data, benchmarks against Indian workforce norms. Formatted for a board presentation. When your global CHRO asks about India health metrics, you'll have an actual answer.	Scheduling, employee communications, lab coordination, reporting — Anara handles all of it. Your HR team's job is to approve the date and share the employee list. We take the full administrative burden off your plate.	Bengaluru, Mumbai, Pune, Chennai, Delhi NCR, Hyderabad. If you have employees there, we can reach them. Multi-city deployments run on a coordinated schedule so your population health data is comparable across locations.

SECTION 12

Frequently Asked Questions

6 FAQs addressing the most common objections from India HR Directors. Answers are direct and confident, not defensive.

Will this interfere with our existing TPA or broker arrangement?	No. Anara can work alongside your GMC and TPA, not instead of them. Your broker relationship doesn't change.
How does Anara help avoid adding work and burden onto my HR team?	Your HR lead confirms the clinic date, shares the employee list, and sends the internal communications. Anara handles everything else — equipment, doctors, employee reminders, lab coordination, and the post-clinic report. Most of our HR contacts tell us we're the one health vendor they don't have to manage.

What participation rate can we realistically expect?	85%+ is our consistent range across client sites. We come during working hours, we come to your office, and we make it easy. The industry average for externally run programs is 40–50%.
Can you cover our employees' parents as well?	Yes — this is one of our flagship programs. Anara's Care Managers can do weekly home visits for enrolled parents across any of our service cities, on on demand Telehealth. The Care Manager manages medications, lab coordination, hospital accompaniment, and sends real-time WhatsApp updates to the employee. It's the benefit that gets mentioned most in employee reviews.
What does executive health look like for senior leadership?	We send an Anara doctor to your office for a dedicated session with your senior leaders. More thorough than a standard health check: cardiovascular risk profiling, executive stress assessment, full blood panel, 1:1 consultation. No waiting. Full confidentiality. Leaders get a personal health summary and a 12-month preventive plan.
How does billing work?	Most clients structure payment through their OPD reimbursement budget or as a direct health services contract. We work on a per-employee per-year basis or per-engagement fee, depending on what makes most sense for your procurement structure. There's usually a clean path that doesn't require a new budget approval — we'll walk you through the options on the first call.

SECTION 13

Final CTA

The closing conversion block. Direct, low-stakes framing. Speak to the busy HR Director who has been nodding along.

HEADLINE:

Ready to make your India HR look good?

SUBTEXT:

You have 10 things on your plate. Healthcare is one of them. Trust us — we're the only ones who will make you look good on that item. Let's talk for 30 minutes.
