

ANARA HEALTH

Website Copy Brief on Strux Design Team

Prepared for Vivek / Strux Design Team | May 2026

SECTION 0 — Navigation & Global Elements

0.1 Navigation Bar Tagline

Corporate Healthcare for India's Workforce

NOTE: This tagline sits beneath or alongside the Anara logo in the nav. It signals B2B intent immediately — HR managers and CHROs self-identify on arrival. Do not use consumer-facing language here.

0.2 Primary CTA Button (global)

Request a Quote

NOTE: Used in the nav, hero, and services sections. Do NOT show pricing on the site. The CTA triggers a contact / lead form or redirects to the contact section. Formspree form action ID must be replaced with the live ID before launch.

0.3 Secondary CTA (hero & footer)

Book a 30-Minute Call

NOTE: Link this directly to Dr. Jason's calendar booking link (Cal.com, Calendly, or equivalent). Removes friction for warm leads who want to talk immediately rather than fill a form.

SECTION 1 — Hero Section

1.1 Primary Headline

A doctor's visit that fits between meetings

NOTE: Team-agreed headline from the Strux review call. Concise, imagery-driven, resonates with time-pressed senior employees. Do not change without A/B test data.

1.2 Subheadline / Supporting Copy

Anara brings world-class healthcare to your employees — on-site, on-demand, and at no cost to them. From preventive health checks to specialist teleconsults, we make it easy for your team to stay healthy without leaving the building.

1.3 Hero Proof Stats (3 stats, displayed as large numbers)

87% of enrolled employees use Anara at least once a month

4.9 / 5 average satisfaction score across all consultations

< 4 hrs average time from booking to confirmed appointment

NOTE: Pull the 87% usage stat to the hero — it is the single most persuasive number on the site and is currently buried. Stats must appear as large typographic callouts, not in a table. Footnote (small text below stats): 'Based on enrolled employee usage data across active Anara corporate accounts, Q4 2025.'

1.4 Hero CTA Buttons

Primary: Request a Quote

Secondary: Book a 30-Minute Call

SECTION 2 — Credibility Bar (NEW — HIGH PRIORITY)

This section does not exist on the current site and must be added urgently. It should appear directly below the hero, as a horizontal bar or row of credential logos/badges. Prospects make trust decisions in seconds — this bar prevents early bounce.

2.1 Credential Items (display as icons + short text)

- Harvard Medical School — clinical research and protocol development
- NASA Ames Research Center — occupational health methodology
- Apollo Hospitals network — diagnostics and specialist referral access
- Ex-military medical leadership — programme discipline and compliance standards
- Published peer-reviewed research in occupational and preventive medicine

2.2 Accreditation Badges

Display the following badges in a single row. ISO 27001 badge must include the footnote below.

- DPDP Act 2023 Compliant
- Azure Central India — all health data stored on Indian soil
- ISO 27001 Certification (in progress)*

*NOTE: *ISO 27001 certification is currently in progress. Display the badge with an asterisk and the footnote: 'ISO 27001 certification process underway; expected completion Q3 2026.' Do NOT present it as a current, active certification.*

SECTION 3 — The Problem We Solve

3.1 Section Headline

Your benefits programme is strong. Your participation isn't.

3.2 Body Copy

Most companies invest in healthcare benefits — but fewer than 1 in 5 employees ever uses them. The reason is rarely cost. It's friction: booking systems that require 45 minutes of hold time, clinics located across town, and appointments that clash with packed calendars.

Anara removes every barrier. We bring qualified doctors, diagnostics, and mental health support directly to your workplace — or to your employees' phones in under four hours. The result: a healthcare benefit your workforce actually uses.

3.3 Stat Callout

85% of corporate health programmes see less than 20% active employee participation*

*NOTE: *Industry benchmark based on employer health engagement research (Willis Towers Watson / Mercer). Include this footnote verbatim directly below the stat on the page.*

3.4 Contrast Statement (small text or caption below stat)

Anara accounts average 4x the industry participation rate within 90 days of launch.

SECTION 4 — Our Services

4.1 Section Headline

Everything your workforce needs. One unified programme.

4.2 Service Cards (3 cards, side by side)

Each card: Title + 3–4 bullet points + short description. NO pricing on any card.

CARD 1 — On-Site Primary Care

- Qualified doctor at your premises on scheduled days
- General consultations, chronic disease management, preventive check-ups
- Prescription and sick-note issuance on the spot
- Includes employees' parents and immediate family members

CARD 2 — On-Demand Telehealth

- Video or phone consultation within 4 hours, any day of the week
- Specialist referral network across 30+ disciplines
- Mental health support: counselling and psychology sessions
- Prescription delivery to home or office

CARD 3 — Workplace Wellness Programmes

- Quarterly health screenings and biometric checks
- Nutrition, fitness, and stress-management workshops
- Executive health assessments (comprehensive annual check-up)
- Aggregate health reporting for HR — no individual data shared

4.3 Privacy Statement (below all three cards)

Employee health data is strictly confidential. HR receives only anonymised, aggregate health trend reports. Individual consultation records are never shared with employers.

NOTE: This statement must appear clearly below the service cards. It directly addresses the #1 employee adoption barrier: fear that HR will see personal health data.

4.4 Services CTA

Request a Quote | Book a 30-Minute Call

SECTION 5 — How It Works

5.1 Section Headline

Up and running in 2 weeks. No IT integration required.

5.2 Four Steps (numbered, horizontal flow)

Display as a horizontal 4-step process with icons. Steps continue into an 'ongoing' cycle badge.

STEP 1 — Discovery Call (Week 1)

We spend 30 minutes understanding your workforce size, locations, and existing benefits. We design a programme tailored to your needs and present a no-obligation proposal.

STEP 2 — Onboarding (Week 2)

Our team handles all logistics — scheduling, app setup, employee communication, and on-site orientation. Your HR team's time commitment: under 4 hours total.

STEP 3 — Go Live

Employees book their first consultation from day one. On-site visits begin on an agreed schedule. The Anara app is live and accessible to all enrolled employees and their families.

STEP 4 — Monthly Reporting

You receive a monthly aggregate health report: utilisation rates, top health concerns, programme ROI metrics. No individual data. Full DPDP compliance.

ONGOING — Continuous Improvement

Quarterly programme reviews with your HR lead. Specialist panels, wellness campaigns, and seasonal health drives tailored to your workforce's evolving needs.

SECTION 6 — Pilot Offer (NEW SECTION)

This section should appear between 'How It Works' and 'Meet the Team'. It converts fence-sitters by lowering commitment risk. The pilot framing also accelerates the sales conversation from 'should we do this?' to 'how do we structure this?'

6.1 Section Headline

Start with 50 employees. Scale when you're ready.

6.2 Body Copy

Not ready to roll out company-wide? Start with a 90-day pilot for one team, one floor, or one location. You'll see real utilisation data, real employee feedback, and a clear ROI picture — before you commit to a full programme.

6.3 Pilot Package Highlights

- Minimum 50 employees
- 90-day structured pilot with fortnightly check-ins
- Full access to on-site and telehealth services
- End-of-pilot ROI and utilisation report
- No long-term contract required to start

6.4 FOMO / Urgency Line

We are currently onboarding a limited number of pilot accounts for Q3 2026. Companies that complete a pilot this quarter are typically live company-wide before their annual benefits renewal.

NOTE: Update the quarter reference each quarter. This urgency language is real — Anara's onboarding capacity is genuinely limited. Do not remove it.

6.5 Pilot CTA

Apply for a Pilot Slot | Book a 30-Minute Call

SECTION 7 — Meet the Team

7.1 Section Headline

Built by clinicians. Designed for enterprise.

7.2 Section Intro

Anara was founded by doctors and operators who have spent their careers at the intersection of high-performance organisations and preventive medicine — from military field hospitals to Ivy League research labs to India's leading hospital networks.

7.3 Founder Bios

RAHUL PARUTHI — Co-Founder & CEO

Rahul brings 15+ years of leadership experience across corporate operations and healthcare delivery in India. Before Anara, he scaled health and wellness programmes for multinational workforces across financial services and technology sectors. His focus at Anara is building the systems that make enterprise healthcare frictionless for HR teams and employees alike.

DR. JASON PARUTHI — Co-Founder & Chief Medical Officer

Dr. Jason trained at Harvard Medical School and completed occupational health research at NASA Ames Research Center. He has published peer-reviewed work on preventive care in high-performance environments and served as a medical officer in roles demanding precision, speed, and protocol discipline. At Anara, he leads clinical standards, physician recruitment, and evidence-based programme design.

7.4 Advisory / Clinical Network Note

Our clinical network includes specialists from Apollo Hospitals, senior occupational health researchers, and advisors with experience across military medicine, sports medicine, and corporate wellness.

NOTE: Add individual advisor cards as headshots + 2-line bios become available. Placeholders are acceptable for launch.

SECTION 8 — What Our Clients Say

8.1 Lead Testimonial (display first, largest)

"87% of our employees have used Anara in the last 30 days. I've never seen engagement numbers like that from any benefits programme. Our HR team went from managing complaints to receiving thank-you messages."

— Head of HR, Global Technology Company, Bengaluru (3,200 employees)

NOTE: This is the most powerful testimonial. It anchors the 87% stat from the hero section. Display it first, in a larger font or a highlighted box, before the other two.

8.2 Supporting Testimonials

"We piloted Anara with 200 employees and had full senior leadership endorsement within 6 weeks. The ROI case practically wrote itself — reduced sick days, higher eNPS, and no administrative burden on HR. We've since rolled it out across all India locations."

— VP People & Culture, MNC Financial Services, Mumbai (12,000 employees)

"Our employees were sceptical at first — they assumed it was just another unused app. Six months in, Anara is the most talked-about benefit we offer. The on-site doctor is booked out two weeks in advance."

— Chief People Officer, Indian Conglomerate, Hyderabad (8,500 employees)

8.3 Scale Sentence (below testimonial block)

Anara currently serves 40,000+ enrolled employees across 18 enterprise accounts in India.

NOTE: Update this number quarterly. It signals scale and de-risks the 'are you big enough?' objection.

SECTION 9 — Category Statement (NEW — Optional placement: About / Footer / Hero sub-copy)

This paragraph can live in multiple places: an 'About Anara' section, as sub-copy beneath the hero, or as a closing statement in the footer. It is designed to make Anara the category definition, not just another vendor.

9.1 Category Paragraph

Corporate healthcare in India has historically meant a list of hospital empanelments and a helpline number. Anara is building something different: a fully managed, measurable, on-demand health programme that functions like a benefit your employees actually want — and that HR teams can justify to a global CHRO with real utilisation and ROI data. We call this Employer Healthcare as a Service.

SECTION 10 — Final CTA Section

10.1 Section Headline

Ready to see what this looks like for your company?

10.2 Sub-copy

Our team typically responds within 48 hours. If you'd rather talk first, book a 30-minute call directly in our calendar — no sales pitch, just a conversation.

10.3 CTA Buttons

Primary: Request a Quote (leads to contact form)

Secondary: Book a 30-Minute Call (calendar link)

NOTE: Both buttons must be present. The calendar link dramatically increases conversion from visitors who are warm but not ready to fill a form.

10.4 Contact Form Fields

- Full name
- Work email address
- Company name
- Approximate number of employees
- What are you looking for? (dropdown: On-site care / Telehealth / Wellness programme / Full programme / Not sure)
- How did you hear about Anara? (optional)

NOTE: Keep the form short. 6 fields maximum. Formspreet action ID must be replaced with the live production ID before launch.

10.5 Reassurance Line (below form)

We never share your information. No spam, ever.

SECTION 11 — Global Copy Rules & Small Fixes

11.1 Language Consistency

- Use "programme" (not "program") throughout — Indian/British English standard
- Use "On-Demand Telehealth" (not "WhatsApp Care") — the service has been rebranded
- Use "employees" not "members" in client-facing copy
- Use "corporate account" or "company" not "client" in public-facing text
- WhatsApp may be mentioned as a communication/booking channel only — never as the clinical platform

11.2 Punctuation

- Remove trailing periods from all bullet points and short taglines
- Headlines: no trailing periods

- Only use periods in full body paragraphs

11.3 Mental Health

Mental health support must be listed as a standalone service item within the Telehealth card. Do NOT bundle it inside the Executive Health section — this makes it feel exclusive and stigmatising. It is available to all employees.

11.4 WhatsApp / Data Handling

If WhatsApp is mentioned anywhere as a booking or communication channel, add the clarification: 'Consultation notes and health records are stored securely on Anara's DPDP-compliant platform, not on WhatsApp.' This addresses a common data-privacy objection during enterprise sales.

11.5 Remove / Archive

- Remove the existing Appendix section — it is internal-facing and should not appear on the live site
- Remove all placeholder/Lorem Ipsum text before launch
- Remove the Formspree placeholder ID ('REPLACE_WITH_YOUR_ID') and replace with the live ID
